ABOUT CHÂTEAU

Tenon was founded in 1979 in Taiwan by Mr. Chang, with the goal of “creating musical instruments that are both playable and affordable.” After 10 years, Tenon began building an instrument factory to further enhance its production capabilities. In 1999, a crucial milestone was achieved with the establishment of Tenon’s own brand, Château.

The inspiration for the name of Château comes from Mr. Chang ’s hometown, which is pronounced similarly to the French word “Château” (the English meaning is castle). He not only hopes to evoke nostalgia for his hometown through this name, but also to convey that Château's instruments, specifically saxophones, are as long-lasting as castles.

Château saxophones are handcrafted from beginning to end. Every process – from shaping, soldering, buffing and lacquering, to assembling – is completed under strict quality controls in our factory. Therefore, Château’s saxophones have many great features, such as precise intonation and superior resonant and pure sound. One of the most important aspects is that they are durable.

Château pursues superior quality and friendly after-care service. We listen carefully to users’ feelings via our agencies. We believe that the opinions and feedbacks from users are the key for further growth and breakthrough. Château is committed to excellence, unique style, innovation, and constant improvement in quality. You will find Château saxophones can give you much more than you expected!

VERSAILLES

Series

The 90 series is a handcrafted saxophone with 92% copper. The 96 series saxophone is made of nickel silver and is made by hand.
